Planning Application S6/2010/0134/FP

I understand the above application relates to the removal of the existing brick and flint wall and replacing it with metal railings.

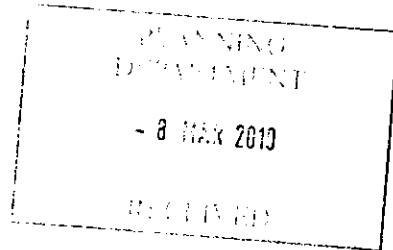

As an immediate neighbour I am surprised I have not been notified, but I am opposed to the removal of the historic wall that matches the church building - the proposed railings are quite inappropriate for a rural setting such as this is and would be better to repair the existing wall.

Has the Conservation Officer been consulted on the proposal?
