Comment: I have just returned from holiday and have been advised by neighbours of the new submission.

1. Why was we not consulted when other neighbours have?
 2. The new submission of the rear block brings the building within 1 metre of the bottom of our garden and affects our privacy and sunlight.
 3. In the last proposal at least there was a space between the block and the fence perimeter.
 4. The colour scheme of purple is not in keeping with the existing landscape and find this totally inappropriate.
- The submission of my objection I trust will be considered, and would request that I be kept informed of all future proposals.
