Comment: I think it is an extremely good idea to reduce the size of these trees. I live in 81 Park Meadow and one of these trees overhangs my property. Because of the height of the tree when the conkers fall off (some in their green spikey casing and later in the year the conkers) they break pots etc in my garden and also they are dangerous because if a conker was to hit someone on the head it could do some damage! I would therefore request that when this work is being carried out that the large branch that overhangs my back garden is removed. That would be fabulous. Many thanks.
