SUSTAINABILITY CHECKLIST FOR HOUSEHOLDER APPLICATIONS

The overall aim of the District Plan for Welwyn Hatfield is to make development more sustainable in order to improve people's quality of life. This checklist has been drawn up to identify the things that could make householder development more sustainable. The intention is that this should be completed and returned with your planning application form. It will then be used by the Council in assessing whether your proposal is acceptable.

However, this checklist only covers sustainability issues. There will be other matters which the Council will need to consider, such as design, which are set out in the District Plan and in this document. In designing your extensions, buildings or alterations you should refer to the relevant policies and standards.

Applicants should be aware that if their house is a listed building or in a Conservation Area, some or all of the criteria may not be appropriate to their application. In such cases you should contact a Planning Officer at the Council to discuss the checklist.

cases you should contact a Planning Officer at the Council to discuss the checklist.			
Please state how your proposal addresses the following criteria:			
Minimize any impact on the daylight, sunlight and privacy enjoyed by any neighbouring property.			
EXPENSION IS SET AWAY FROM ADJOINING OWNERS AND WILL NOT AFFECT DAYLIGHT.			
2. Make best use of the sun's energy to reduce energy costs e.g. south facing living room windows.			
the south and west theing			
Maximize other opportunities for energy saving, such as cavity wall insulation, double-glazing or loft insulation.			
ALL insulation complies with
