Comment: I consider that the proposed plans for the above extension will have a negative effect on myself, my property and gardens. I consider the current planning dimensions are out of character for this area. I therefore object to the current proposal. I suggest that the planned extension is reduced in length enabling it to remain in line with neighbouring one storey extensions, and that it is reduced in height in order to minimize the overbearing appearance from my property, which will ultimately reduce daylight into my own extension. It is highly important to acknowledge that any proposed extension of this size would need to be at least one metre from the neighbouring boundary in order to {1}Allow some additional light to my property and {2} to provide suitable space for the builder to carry out the proposed work as it would be impossible for work to be done that would impinge on my side of the boundary.
