Comment: We strongly object to this modified scheme. The three storey high square northern flank wall to the main block is immediate adjacent to our rear garden and will:

- present an extremely ugly 9m high wall with no features to break up the mass that will dominate the rear view from all the windows and the garden
- block more than 20% of the direct light to the rear windows which we believe is contrary to our right of light
- Now has windows to the main living rooms which will overlook our garden and our rear windows represents a significantly worse scheme than originally proposed
