Jackie

I have looked at the application and have no major problems with the proposals. However, it would be useful to know if any new air handling or refrigeration plant will be provided, where it will be sited and it's noise rating. If there is no new plant, I have no objections or recommendations to make.

I would suggest the following two informatives re licensing and food safety;-

Please note the Public Health and Protection service is responsible for food safety enforcement, you are advised to consult them about any alterations that are being made to food storage, preparation and cooking areas. The alterations may affect your premises licence; this should be discussed with the licensing section of the Council's Public Health and Protection service.

I hope the above is helpful

Kind regards

Roger Evans
Environmental Health Officer
