Comments	<p>We have looked at the plans with our neighbour and agree to them all in principle. However we should point out that we are currently undergoing a subsidence claim with our home insurers, originally registered in September 2018 after substantial cracks started to appear inside and outside our house. These cracks are still being monitored. One large oak tree, believed to be responsible for some of the damage, has already been felled. Another much larger tree is still to be removed but we are dependent on Welwyn Hatfield council reversing the TPO on this and agreeing to it once our insurers have gathered all the evidence necessary to do so. At the moment our estimated completion date from the insurance company is summer 2021, although this might be over optimistic as the completion date has already been extended several times already.</p>
