Comments	<input type="text" value="Hi. These windows are in dire need of replacement for both security and costly heating bills in winter. Not to mention the rot. The top floor cant open some of their windows and the glass is likely to fall from height, smash or hurt someone. Also I note that the planning is windows. The 2 floor flats, 131 and 141 have their own entrance, seperate from the comunual entrance and are old wooden doors that don't seal well and should be included in the replacement. Can this please be checked? Thanks you. I greatly welcome the replacements and I have no objections."/>
