<b>Comments</b>	<input type="text" value="Was the original property built with foundation strength to take another floor and has the subsidence suffered in the immediate surroundings been taken into account. What ADDITIONAL provision for car parking has been made - the current parking is insufficient for the existing number of units and most of the garages are used for non-vehicle storage. Has the right of way and parking rights for properties on Plough Hill and in Station Road been considered both during the work and after. We would expect compensation if we have to park elsewhere during the works. Bearing in mind the local problems with subsidence and the slope of adjacent ground this proposal seems pure folly."/>
