Comments	<input type="text" value="According to the plans a fire escape is to be put on the side of the building. Anyone on this fire escape will be able to look directly into all my front rooms including my bedroom, bathroom and dining room. Since this building has been used as a hostel/low cost hotel the quality of life in this area has gone down considerably, caused by the police being very often in attendance for various matters. This is supposed to be a residential area. There is insufficient parking available for the amount of people staying there now so where extra space would be found I do not know. An amount of the people staying there have very large vans that clog up the street. This also causes an increase in pollution. As smoking is not allowed inside, groups of people very often congregate outside the front doors smoking or making phone calls causing a noise nuisance late at night. There are plenty of hotels locally. The YMCA are opening a large facility on Comet Way."/>
