## Condition 16 (External lighting scheme)

#### CONDITION

No development above ground level (excluding demolition) shall take place until details of an external lighting scheme has been submitted to and approved in writing by the Local Planning Authority. The details must include:

a) A site plan showing the location of the external lighting (ground based, on building and in roof gardens);

b) Metrically scaled elevations of the types of external lighting; and

c) Vertical lux diagrams showing potential light trespass into windows of the approved residential units and neighbouring residential properties outside of the site.

The external lighting scheme must meet the requirements within the Institution of Lighting Professionals guidance notes for the reduction of obtrusive lighting, and should be designed to minimise light spill, in particular directing light away from any boundary vegetation / trees to enable dark corridors to be used by wildlife as well as directing lighting away from potential roost / nesting sites.

The approved details must be implemented prior to first occupation of the development and retained permanently thereafter.

#### RESPONSE

To assist with site safety, to protect the living conditions of future occupiers and neighbouring properties in terms of light spill, and to protect wildlife, we have provided details of an external lighting scheme with a site external lighting layout, luminaire schedule and lux diagram.

Attached drawings/schedule sheet under appendices demonstrate that condition has been complied with.

#### REASON

To assist with site safety, to protect the living conditions of future occupiers and neighbouring properties in terms of light spill, and to protect wildlife, in accordance with Policies D1, D7, R11 and R20 of the Welwyn Hatfield District Plan 2005; Policies SADM16 and SADM 18 of the Welwyn Hatfield Borough Council Draft Local Plan Proposed Submission August 2016, and the National Planning Policy Framework.
