Comments	<input type="text" value="Objections:- The front elevation is still compromised by not incorporating a full hip roof in the design and subsequently still changes the character of the building, roofline and streetscape. The projection of the rear single storey extension by 3m on the party wall side still impacts visual amenity. Impact of three storey side and rear extension is overbearing and compromises privacy in the immediate neighbourhood. Believe this is over development of what is currently an affordable family home."/>
