The Group object to this application for retrospective permission to retain six columns with attached lights around perimeter of existing manege.

The site is located in Green Belt on a Wildlife Site and in the Northaw Common Parkland Landscape Character Area.

The columns are out of character in the area. Condition 3 of planning permission S6/2003/0371/FP, stating there should be no floodlighting for the manege, was inserted for good reasons, which in our opinion are still appropriate.
