Good Afternoon,

I have reviewed the documents and am able to recommend discharge of the following conditions:

- 1 (construction management plan) as it has been proposed how pollution will be dealt with.
- 2 (surface water drainage) as infiltration will not be used and the proposal is to use the Hatfield Business Park sites widely adopted foul and surface water drainage system.
- 7 (details of foundation design of approval) as we have discussed with the developers structural engineers regarding our concerns of connecting upper and lower aquifers, and migrations of the bromate plume. The use of vibro stone columns were proposed to address these concerns and are confirmed in the recent document submission for discharge of condition.

Kind regards

Laurence
