Made and published by the Director General of the Ordnance Survey, Southampton.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

- Take the two letters preceding the sheet number..... TQ 058
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin..... 058
- Estimate tens of metres from the grid line to the point (distance e)..... 8
- The resulting four figure number is the Easting..... 0588
