Comments	<p>The bottom of our garden shares a boundary with the applicants land and is already protected by our enclosed garden and totally secure 1.2m high wire mesh fence. There is no possible access for flytippers, trespassers or stray animals from our land onto the applicants land and the erection of a 2m high, industrial type fencing on open fields and farmland is totally out of keeping with the area. While 2m high fencing has already been erected in other parts of the applicants boundaries it is obscured by woodland, large shrubs and hedges, the proposed fence will be erected in a pasture field, in full open view with no woodland or hedges to obscure the eyesore. I strongly suggest that if a fence is deemed necessary along the applicants north boundary a 1.2m fence would be adequate in protecting the applicants land, more in keeping with the area and would not be objected to by myself or the residents of adjoining properties.</p>
