**Comments**The siting of this development is dangerous due to its proximity to the junction between

Northaw Road East/West and Cattlegate Road. Although the number of dwellings has been reduced by 4 from the previous application this will still result in a significant increase in traffic The B156 is a heavily trafficked route, as defined by Policy SADM18 of the 2016 Sustainability Appraisal. This stipulates that an air quality assessment needs to be carried

out for developments on the B156
