Comments	<p>This is one of three identical applications, which at this moment, my comment is also identical. "Thank you for sight of this application. Before I could comment, I would need to know who the intended occupants are to be. The security requirements for an elderly population, with alzheimer's would be entirely different for that of, say a children's home. The documents supplied do not supply this information. If I could be told who the intended occupants are, then I can comment further."</p>
