Dear sir,

I am strongly opposing for the application for a large cafe/restaurant at Barham Court Cuffley Hertfordshire. My reason being, we are a small village and there are enough restaurants and take away food outlets that serve our community. There would be a large problem with regards to the parking of cars.

I feel that the people that are buying brand new flats at Barham Court would never have bought a property knowing that there would be a cafe restaurant in their block of flats. I know that I would never have bought a flat if I knew about this application.

They are proposing to Open from 8am until 11pm at night. There would be an enormous flue outside the building to let out the cooking fumes, and people wouldn't be able to sit out on their balconies, or open their windows in the summer because of the smell and fumes of cooking. It's horrendous to think about it.

The hours are long from 8am in the morning until 11pm at night. With late night noise and disturbances in the community.

Would you allow a food outlet in you block of flats if you lived there.?

I do hope that you are successful in refusing this application. I would hate to think that if permission was granted, that it could affect other food outlets in the village. Which could result in empty boarded up shops. It would be a pity as this is a lovely village, with good people living here.

Kind Regards

Dora Georgiou
