WARNING: This email originated outside the WHBC Network. Please be extra vigilant when opening attachments or clicking links.

I understand that there is a planning proposal to build 26 houses on this site on a green belt field near to Firwood.

I object to this proposal which creates a separate community not joined to Potters Bar.

This will have an impact on the integrity of the green belt setting a precedent for further development.

There are no basic services at this location encouraging car use to commute , journey to shop and the school run. This traffic will add to the congestion during peak periods when traffic currently stands from the edge of Potters Bar into the town.

This will also add to air pollution which I understand approaches recognised limits.

I also note that it will devalue the natural habitat formed by Firwood.
