Dear David,

We understand that the only additional information provided is a letter from the LLFA to the applicant regarding works to the ordinary watercourses. Within this letter (dated: 27.01.2021), we as the LLFA, highlight a requirement for a follow up site visit later in summer of 2021 in order to inspect the operation of the watercourses in dry conditions to ascertain if there is any potential impact on ecology in and around the watercourse. Therefore, we would like to recommend a further holding objection to this application as we are unable to fully assess the feasibility of the works until this visit has been completed.

If you have any further questions or require any further comments, please let us know.

Best regards,

**Rosie Brown**
