

Sketch proposals are for illustrative purposes only & as such are subject to detailed site investigation including ground conditions / contaminants, drainage design & planning/density negotiations.

- 22. Manholes with outgoing pipes greater than 600mm dia. shall be fitted with guard bars, safety chains or other
- 23. All soft spots encountered in the trench formation to be removed and replaced with graded granular material
- 24. Where a pipe trench is within 1m of a building, the pipe is to be provided with concrete protection and the trench filled with concrete up to a level below the building equal to the distance from the building less 150mm.
- 25. Where the formation of a pipe trench is above original ground level, levels are to be made up with compacted
- 26. All buried concrete must cater for Class 2 sulphates conditions in accordance with Table 1 of BRE digest 363.
- 27. Concrete protection shall be provided to all pipes with less than 300mm cover in pedestrian areas, to all pipes with less than 600mm cover in private driveways not used by commercial vehicles, and to all pipes with less than 1200mm cover in roads or private driveways used by commercial vehicles. Where concrete surround is specified flexibility of joints is to be maintained by using compressible bitumen impregnated fibreboard at each
- 28. The design of any temporary works required shall be the
- 29. Do not scale this drawing. All dimensions are in millimetres unless noted otherwise. Any discrepancies are to be recorded and reported to the engineers
- 30. All work is to be to the satisfaction of the Engineer and
- 31. The contractor is responsible for and must take all necessary precautions to ensure the stability of the works
- 32. All workmanship and materials are to be to current British
- . All services are to be located and protected as necessary by the contractor prior to the commencement of the
- 34. The bedding or filter material up to the level 300mm above the top of the pipe barrel shall be placed in layers not more than 150mm thickness and shall be carefully compacted for the full width of the trench with hand tools. The remaining filter material shall be deposited in layers each not exceeding 225mm loose depth.
- 35. Trench sheeting should be removed as the bed surround and backfill are placed to ensure the trench is filled and
- 37. Pipe bedding and 20mm clean filter material shall be a granular material having a grading within the limits of
