Mark

The Travel Plan (submitted formed part of the original planning application (S6/2015/1061/MA)). My comments (7/7/15) identified a few areas that the Travel Plan would benefit from review, however these areas of review would be insufficient to recommend withholding approval of the details in respect of condition 15. The Highway Authority therefore recommend that the Travel Plan (AECOM April 2017) be accepted and approval given in respect of condition 15..

The Highway Authority recognise that the S106 that secured the monitoring and support contribution required this be paid to the Borough Council, however arrangements have been made for this contribution to be paid across from the LPA to the HA, and HCC shall monitor the Travel Plan and ensure reviews are undertaken. Given the nature of the condition by which the Travel Plan is secured, the Highway Authority may require the assistance of the LPA in obtaining monitoring reports in future years.

Best regards  
Alan
