Dear Ms Hill

Thank you for these detailed plans, which I did not find when I looked at the application previously. I have now located the trees which seemed to be of most historic importance.

It would seem that the *Castanea* to be felled form part of an very old Sweet Chestnut Grove, probably much depleted over time. Although their loss, and that of the *Quercus robur* 626, is to be regretted we have no objections to the proposals for required maintenance of the tree assets at Queenswood as detailed in the application 6/2016/0043/TPO. Replacement trees, of appropriate species in appropriate locations, would be desirable.

Kind Regards

Kate
