re: 6/2019/0882/outline planning permission for 38 new dwellings.

I object to these plans on the points listed.

1/ this site is on a very busy and difficult junction where

accidents are not unusual, and at certain times off the day there are long tail backs

2/this is a sit alone development with no special reason to be built in the green belt.

3/the only public transport is an unreliable and infrequent bus service towards potters bar

Cuffley train station is a long walk and crews hill station even further up a steep hill with little or no foot paths

4/the increase in the volume of car movements will add to local congestion and pollution.

station rd is a huge bottle neck every week day morning and evening

5/Cuffley infrastructure list no secondary schools , the medical centre is located at goffs oak.
