Comment: I do not believe due regard has been paid to potential noise disruption to the area (as was the case with Arla) we are under constant noise pollution from Arla already ..Light pollution is also excessive .We do not need anymore .The traffic at peak times is horrendous. We do not need the that being exacerbated!! There is no way out of the garden village at times due to the traffic and particularly lorries coming out of the business park .Finally there is never enough parking .Our roads already get clogged up by students during the university terms and by workers from the business park ..
