Comments:

Last year we endured many hours of excavation late into the evening and at week ends. So we hope this will not carry on in the same manner for completion on the Course. The 7th hole is totally over water which does happen but balls flying across the lake will disturb the wildlife. Many of the birds come backwards and forwards to our ponds, not far away but this lake has been peaceful for nesting etc for many years It would be good if Monsieur Arnault would consider opening the course for one day a year- for the village as the previous owner used to encourage locals.

Case Officer:  
Mr David Elmore
