Comments	<input type="text" value="Being a near neighbour I would like to make the following observations . Whilst the westerly elevations will be largely screened by the hedges in the summer months , it should be borne in mind that these are deciduous and in winter the extension will become more visible from Parkway and there will also be more light spillage, perhaps some evergreen planting needs to be introduced. Additionally , if the Church is to be used more often for commercial activities then attention needs to be given to parking ; many people visiting St Francis Church , which is directly opposite , park in the neighbouring streets rather than paying to use the local car parks causing residents many issues. It would be good that when organisations are booking that they are advised to use carparks and not to park in residential areas"/>
