Subject: Erection of rear conservatory at 107 Eddington Crescent

I have looked at the plans for the above conservatory and although I have no objection to one being built I do not wish to have the small windows facing my side of the garden and would like the brick wall built up to the roof of the conservatory. My patio area already gets very hot as it is south facing and the sun will reflect from the windows back onto me.

I shall be making an appointment with Mr. S. Silcocks to discuss these plans.
