Apologies Sarah

Yes I previously discussed the approach with the consultant and I am satisfied the resulting noise assessment is a sound document. It has identified that the development is unlikely to have a detrimental impact on the neighbourhood.

I have no adverse comments to make regarding this application.

I would add that it may be worth requesting the developer and potential occupiers of the site to discuss health and safety and food hygiene issues with Environmental Health prior to construction and at the very least before opening to ensure it is designed to best practice standards.

Kind Regards

Jeannette

Hi Jeanette

I consulted you on the 13 October concerning a noise survey that had been submitted for Splashlands – N6/2010/3120/DC3. I have not received any comments on this and was wondering if you had had a chance to go through it?

Thanks

Sarah
