Comments	<input type="text" value="When we acquired our house from the original developers, we were promised 'country living' with a country park to run from west Hatfield to St. Albans. This was soon 'overlooked' and we were left with a mixture of grazing land & original woodland. This proposed development will bring more traffic into an already overly-busy environment and the existing local road network will simply be inadequate for the additional traffic. In addition, the planned development will be extremely harmful for both the environment (including noise & air pollution) plus local wildlife. Given the new developments in the east of St Albans, it won't be long before St. Albans & Hatfield are no longer separated by any green belt land."/>
