> I am writing to express my objection to the proposed development. The current road system cannot handle the volume of traffic this will produce. Currently from 5pm the roads are regularly gridlocked in this area. Added to the traffic problem are any unusual traffic occurrences. Eg. A recent accident in Ascot Lane caused delays around the AL10 9EN area. Residents were queuing from 7:30 along the estate. Last winter during some bad weather the entire Salisbury estate and Business Park were gridlocked. Another 1000 houses will exacerbate this problem. Traffic on Hatfield road towards St. Albans will be affected as it already queues in the morning to Smallford. Surrounding villages and Lanes will be adversely affected as people will try to find alternative routes.
