Comments	<input type="text" value="There seems to be little to alleviate the effects of an additional 1600 vehicles. The map suggests that access to the new villages will be via Albatross Way, currently accessible from Mosquito Way only and Coopers Green Lane, which is little more than a country lane, impassable by two vehicles through most of its length - I can't see anything to suggest plans to widen this, or other boundary roads. Roads accessing the dual carriageway are currently grid locked between 8-9am and 5-6pm. There appears to be no additional roads to deal with traffic from the villages onto existing roads which already struggle at peak times. Additional roads and foot traffic will almost certainly impact on the existing wildlife."/>
