

# Comment for planning application 6/2018/2768/OUTLINE

<b>Application Number</b>	6/2018/2768/OUTLINE
<b>Location</b>	Hatfield Business Park Hatfield AL10 9SL
<b>Proposal</b>	Outline application for a large-scale mixed use development including 1,100 new homes and supporting infrastructure including a primary school, local centre and open space with all matters reserved
<b>Case Officer</b>	Mr Gerry Ansell
<b>Organisation Name</b>	
<b>Address</b>	31 Ellenbrook Lane Hatfield AL10 9RW
<b>Type of Comment</b>	Objection
<b>Type</b>	Neighbour
<b>Comments</b>	<p>Bromate contamination on proposed housing development Hatfield Green. NPPF states: Site investigation information: Includes a risk assessment of land potentially affected by contamination, or ground stability and slope stability reports, as appropriate. Building on contaminated land: The proposed site Hatfield Green crosses one of the highest levels of bromate contamination in Europe. Levels in excess of 1000µg/l have been detected by the Environmental Agency (EA). This contamination to the Aquifer (water bearing chalk) means that water from wells or any water from the Aquifer must not be consumed. The maximum levels set by the WHO is 10µg/l. Any building to a depth nearing the Aquifer may cause cross contamination to surface water and spread the contamination in different directions.</p>
