I object to the above proposal for the following reasons.

- It takes away a large area of land originally allocated and promised as a country park in 1999. It appears to me that the developers are happy to renege on this promise for purely financial gain.

- Local infrastructure is already stretched to the limit with existing developments, both actual and proposed, and this one can only exacerbate the problem.

- This in turn will lead to increased noise and air pollution to the detriment of both residents and the environment.

- The existence of bromate on the site has been highlighted in previous reports as a serious potential risk to local drinking water. That risk remains.
