**By email:**

Mr Gerry Ansell  
Welwyn Hatfield Borough Council

18 December 2018

Dear Mr Ansell,

**Re: Planning Application Consultation: 6/2018/2768/OUTLINE**

**Proposal: Outline application for a large scale mixed used development including 1,100 homes and supporting infrastructure including a primary school, local centre and open space with all matters reserved.**

**Location: Hatfield Business Park, Hatfield AL10 9SL**

NHS England and East & North Herts Clinical Commissioning Group have now had an opportunity to review the impact of this proposed development on local health provision.

Should this development of 1,100 dwellings go ahead, based on an occupancy of 2.4 it will create circa 2640 new patient registrations.

Despite premises constraints GP Practices are not allowed to close their lists to new registrations without consultation with, and permission from, the East and North Herts Clinical Commissioning Group. We expect such applications to increase as the new developments in the area go live. Even when surgeries are significantly constrained East and North Herts CCG and NHS England would not wish an individual patient to be denied access to their nearest GP surgery. Patient lists are therefore only closed in exceptional circumstances.

However, when a large number of new dwellings and registrations is planned the preferred option is to try and find a way to absorb those significant demands upon surgeries by providing additional resources, e.g. re-configuring, extending or relocating the practice to provide sufficient space to increase clinical human resources and clinical services and thus keep the patient lists open. A developer contribution under these circumstances is considered fair and reasonable.

'Constrained' means a practice working to over-capacity for the size of their premises and the clinical space available to provide the required services to their patients. A Practice in this situation would usually need to be re-configured, extended or even relocated to absorb a significant number of new registrations.

Patients are at liberty to choose which GP practice to register with as long as they live within the practice boundary and NHS England cannot prescribe which surgery patients should attend. However the majority of patients choose to register with the surgery closest and/or most easily accessible to their home for the following reasons; quickest journey, non-car dependent (public transport or walking distance), parking provision if a car journey is necessary, easy access during surgery hours, especially for families with young children and for older adults.

For the above reasons a S.106 contribution is requested to make this scheme favourable to NHS England and East and North Herts Clinical Commissioning Group.

Please note that our calculations below are based purely on the impact of this development, based on the number of dwellings proposed and does not take into account other development proposals in the area.

**Below is the calculation of the contribution sought based on the number of dwellings proposed, for GMS GP provision:**

**Circa 160 dwellings x 2.4 occupants = 2640 new patients**

**2640/2000 = 1.32 of a GP \*GP based on ratio of 2,000 patients per 1 GP and 199m<sup>2</sup> as set out in the NHS England “Premises Principles of Best Practice Part 1 Procurement & Development”**

**1.32 x 199 m<sup>2</sup> = 262.68 m<sup>2</sup> additional space required**

**262.68 m<sup>2</sup> x £2,964\* = £778,583.52 \* (\*Build cost; includes fit out and fees)**

**£778,583.52/1100 = 707.8032 (rounded to £708 per dwelling)**

**Total GMS monies requested: £778,583.52**

East and North Herts Clinical Commissioning Group would propose to focus the monies as previously notified on Northdown Surgery (branch of Wrafton House Surgery in the town centre) which is currently in a non DDA compliant 1970's converted house. At 24 patients per m<sup>2</sup> it is constrained and would not be able to cope with a rise in patient numbers. Its patient demographic and configuration also adds to the challenges it faces. Northdown is 2.1 miles from this development. The 3 main practices in the town centre are:

- Wrafton House - 1.2 miles from this development - 13.68 - whilst not currently constrained at 15.38 patients per m<sup>2</sup> it is 3rd in line and given its position in the town centre will be most likely to see a very significant rise in patient registrations. We would request a trigger point of on occupancy of the 100<sup>th</sup> dwelling. NHS England and the East and North Herts Clinical Commissioning Group reserve the right to apply for S106 money retrospectively and the right to amend.

- Lister House - 1.2 miles from this development - 20.18 patients per m<sup>2</sup> - whilst not currently constrained it is not far from being so.
- Burvill House - 1.4 miles from this development - 32.79 patients per m<sup>2</sup> – being so constrained means it could not cope with an increase in patient numbers.

From a wider perspective investment of S106 in the current practices as aforementioned would help to alleviate the pressure on the Hatfield practices as whole and with a view to future proofing them.

As well as the importance of a S.106 contribution for GMS, it is also vital to consider the impact of developments and additional residents on community and mental healthcare. Based on recent cost impact forecasting calculations, the potential cost impact of these developments going ahead on community and mental healthcare would be as follows:

Mental Health costs:

1,100 residential units x £194.46 = £213,906 – monies to be focused on Roseanne House in Welwyn Garden City

Community healthcare costs:

1,100 residential units x £182.03 = £200,233 – monies to be focused on Queensway Clinic in Hatfield

**Total mental health and community costs requested for development = £414,139**

The CCG and NHS England are keen to continue to work with Welwyn Hatfield Borough Council as well as the developer to ensure that local healthcare services have sufficient investment to meet these additional needs of existing patients. The commissioners' intention is to secure developers contributions to develop, reconfigure and extend existing assets and not commission services from another new building.

In terms of identifying a project in full at this stage we have to bear in mind the following:

- All projects are to be approved prior to implementation via the NHS England Prioritisation and Approval process.
- All planning application responses are uploaded into the public domain; identifying a project at an early stage before funding is secured may raise public expectation and indicate a promise of improvements and increased capacity that may not be viable without a secured financial contribution.
- A project identified and costed at an early stage may not meet the objectives of the current strategies or could have significantly increased in cost, if it has been proposed some time prior to the delivery of the development.
- In line with the five year forward view the way in which primary care is delivered is changing, this includes the amalgamation of practices and co-locating of services. Having flexibility to attribute funding to scheme that may not have been identified at the time of responding to a planning application can help us to provide the most benefit to the community with the least amount of funding.

These points also apply to Community and Mental Health.

At the time of responding to planning applications it is unclear when the development may be delivered, even if the site is listed in the Local plan and features on the housing trajectory for the local authority or indeed if permission will be granted. It remains that this development as with any other if it does materialise will have an impact on primary healthcare provision in the area and its implications, if unmitigated, would be unsustainable. NHS England and East & North Herts Clinical Commissioning Group would not wish to raise an objection to the proposed development but this is dependent on the decision on the S106 monies applied for in our response on the basis the Local Planning Authority may wish to review the development's sustainability if such impacts are not satisfactorily mitigated. When it has been confirmed that this development is to go ahead, when & what the confirmed build out trajectory is then we would be pleased to work with Welwyn Hatfield Borough Council and provide full details of the project to be funded with S106 at the point of draw down.

Yours sincerely
