---

Dear Mrs Cynthia Palmer,

I have received your letter regarding Mr K Chinniah's application for building permission to his house at 107 Eddington Crescent.

I must admit this is devastating news to me. I live at 103 Eddington Crescent and have lived here since the homes were built in 2007.

My home and small garden backs directly onto the side of Mr Chinniah's house. His bathroom window looks directly into my bedroom window from a very short distance already. My home is a small 2 bedroom housing association property and I have a 10 year old and a 7 year old sharing a box room with their clothes in my room due to space. I have been bidding and trying to exchange for several years so the boys can have more space or their own bedrooms. I have had many views from people who love the house but have said the garden is a little small or too overlooked. With a large wall so close to my patio doors I will feel very boxed in and claustrophobic. Having spoken to my 10 year old son about his also he is very upset about the idea and was almost in tears as he knows this would be detrimental to us getting a move to another house and we are desperate to move.

I feel if this extension takes place I will be very very overlooked in all directions as I have town houses to the right also and a wall being directly at the end of my garden will make it feel even smaller and allow less daylight into our upstairs rooms. I do not like the idea of builders being able to see so closely into the upstairs whilst building commences.

I have just passed my qualification to become a childminder also and feel the building works going on whilst trying to start up a business to look after very young children who are likely to require sleep will put off parents wanting to see my service at my home.

I am also concerned about the noise for my own children.  
Having spoken to my neighbour from 101 who backs onto the side of their house also she also said she will be forwarding an email to say she does not agree.

I would like to invite you to please visit my home and see small distance between my back door and the wall which is already there so you can see for yourself how intrusive and how closed in it will feel to have one even closer.

I feel giving measurements will not do justice to what I am trying to express and the fear I now have of this going ahead.

On a very personal note I am trying my best to start up my own business having done a HBCA course for childminding, received my DBS and in contact with Ofsted. I am desperate to get [redacted] as I only currently work part time in a school. I am concerned already due to neighbours [redacted] that this will affect my business but the extension on top makes me feel I will never ever get an exchange from here and my business will not take off. This could be detrimental to my whole livelihood and most definitely the happiness of my children. I m sorry if this sounds very dramatic but I am now very very worried and im working so hard to build myself and my children a better future. The main thing we need to do is move home but I am so very fearful this will stop any chance I have when it is so hard already due to the size of the house, the garden and cost of rent. Please please do not hesitate to contact me if you have any questions or would like to visit so you can see the view of the property from my back door.

Kind regards,

Miss Rebecca Lough
