12 George's wood road

We object to any further developments of the school unless access to the school is re considered. Our village life is slipping away year by year and has a massive impact on our lives. George's wood road and pine grove which is the entrance to my property becomes a no go area in the morning and afternoon..to the point where I cant get out of my drive. When people park on Georges wood road, it becomes a standstill with the amount of traffic and noise. Buses and lorries and cars that come up and down is starting to be a massive problem. They argue, horn each other and cause alot of traffic. Imagine having three buses back to back with their engines running one metre from our living room.

Our village wasnt designed for this amount of heavy traffic which would only build up more if this development goes ahead.

The traffic for Georges wood road and pine grove cannot be sustained and a serious accident is just waiting to happen.
My wife suffers from severe asthma and the amount of pollution from the vehicles are most definitely affecting her health with more frequent visits to the hospital than before .

Another route needs to be considered or vehicles to be limited because if this goes ahead more cars will be coming as well as maybe additional buses.

I therefore object to the proposed expansion of chancellors school.
