Dear Sirs,

We are residents of 21 Pine Grove which as you are aware is the access road to the school. First of all well done to the Council in carrying out the resurfacing of this road in recent months---this all helps.

It goes against my nature to object to planning applications and the quality of the designs so I don't intend to.

However the increase vehicular journeys is a concern . The Traffic Assessment Report , although professionally presented does not deal with the main issue of traffic movement. A one system should have been investigated

(it may well have been) but it is my understanding that The Drive which exits onto the Great North Road was historically bought privately

and an opportunity was missed.

The Drive also exits to the west and links with the Golf Club Road---were there any negotiations to upgrade this road and agree an exit route onto Georges Wood Road

In the afternoon?

Failing all that an increase in both way traffic in Pine Grove is not acceptable from a safety and environmental point of view---therefore please accept this e mail as an

Objection to the planning application for these reasons.

Regards,
