

With regard to the above two Planning Applications I would like to register our objections against the a further two lodge houses being built, plus the proposed new road access to connect with the roundabout at Judges Hill.

There are currently two Lodge Houses in existence, these replaced the original Lodges House for Northaw House, and were already built outside the normal guidelines, the glass house being replaced by a Georgian Style Mansion, making some developer millions. Two more unnecessary Lodge Houses would be built solely to make yet another developer million, and most probably be out of keeping with the original house and the conservation area it is in.

The proposed road would go past one of the existing Lodge Houses, causing the owner of that property much distress and regret of purchasing that property. I am sure they would never have purchased it if there was a prospect of a new road being put in immediately past their property. Also a road coming out of this entrance would a danger to traffic coming up Judges Hill. This road exit is also totally unnecessary as the existing exit in place is adequate and much safer to all other road users.
