<b>Comments</b>	<input type="text" value="This route should not be adversely affected or altered in any way. If and when this development is to proceed the footpath should be protected at a minimum to its current width and surface condition. I would also make the following comments on the potential impacts the development works might entail and the required minimum standards regarding the maintenance of the Public's rights and safety during and after construction. ? The Public Right of Way should remain unobstructed by vehicles, machinery, materials, tools and any other aspects of the construction during works. ? The safety of the public using the route and any other routes to be used by construction traffic should be a paramount concern during works, safe passage past the site should be maintained at all times. ? The condition of the route should not deteriorate as a result of these works. Any adverse effects to the surface from traffic, machinery or materials to be made good."/>
