Dear Raymond

RE: 2165-EasyMix 6/2020/1269/FULL

Further to your email to our agent regarding the environmental health officer's comments dated 02/09/2020, we would respond as follows. We can confirm that there is no change to the operational process on the site. The only change is the erecting of storage silos. This allows for more accurate batching of concrete and in fact reduces loader movements. Prior to the materials being stored in the larger silos, each vehicle was machine loaded with a loading shovel, this is now completed automatically via the silos and batching plant. This reduces loader movements throughout the day. As such we can confirm that the installation of the mobile batching plant has not increased the noise output from the site.

We hope that Environmental Health can now remove any objections and the planning can finally be granted for the retention of the mobile batching plant.

Kind Regards

Mr Andrew Collins
Managing Director
