Comments	<input type="text" value="This is a major development application made by the council and should go before the DMC. It will be hugely noisy as it is high up on the roof facing residential roads and a conservation area. These sources of heat are currently inefficient and will result in high electricity bills that the tax payer will be forced to meet. The noise pollution will disrupt the quiet of the public footpath and local residents. As the pump ages it will inevitably grow more noisy."/>
