Comments	<input type="text" value="1. Why are single light lampposts being made into doubles? Surely, this should have been thought through properly in the first place. I do not believe for 1 moment that the glare will be less than the present plans. It will most certainly be greater. 2. The three new lights on the northern elevation will shine directly into our house. This will interfere with the quiet enjoyment of our house. 3. A 6m lamppost to light up a 1.25m pay station is unnecessary. 4. The whole lighting scheme is ill thought through and should not be allowed. The scheme already approved is more than sufficient. 5. If the scheme is approved it should have a condition that the lights go off at 11pm and don't go on again until 6am."/>
