d) Description of Proposal <input type="text" value="T3 Oak to reduce selective limbs by approximately 3m in height, reduce branches over sailing lawn by approximately 2m in width (tree located in scholars mews grass verge opposite number 17/18) As seen from the annotated picture the main limb growing over from the Scholars mews tree protrudes up above the canopy line. We would like to bring this in line with the majority of the remaining canopy allowing more light to pass over the tree and into the property. Reducing over sailing branches that smother the lower shrub beds will give plants and shrubs light and space to grow. I believe these works to be inline with consented works to neighbouring trees."/>
