

16 Brockwood Lane, WGC, AL8 7BG – Current and Proposed front elevation

Above – existing view, from driveway and from path

Below – proposed view, from driveway and from path

16 Brockwood Lane, WGC, AL8 7BG – Proposed

Proposed view, from driveway and from path

Supplementary comments;

- The application proposes to install an EV charging point to the front of the house, to the left of the front door and under the window.
- Although the EV charging point will be visible from the street we believe we can further mitigate the impact to the street scene by additional soft landscaping (after installation). This will provide additional screening of the charging point from the street.
- In addition, when a car is parked on the driveway the view of the charging point will be minimal unless viewed from the far right of the driveway or at the front door.

16 Brockwood Lane, WGC, AL8 7BG – Charging Device

Ohme Home Pro – Type 2

Dimensions (H x W x D):
170 x 200 x 100mm
