FAO Ashley Ransome
Senior Development Management Officer
Welwyn Hatfield Borough Council

Dear Ashley,

Re. Planning Application Consultation: 6/2024/1342/RM - Land to the north east of King George V Playing Fields Northaw Road East Cuffley EN6 4RD

Proposal: Approval of reserved matters (appearance, landscaping, layout, and scale) following outline planning permission S6/2015/1342/PP as varied by 6/2023/1352/VAR for residential development of 10 dwellings and associated infrastructure

Thank you for consulting the Hertfordshire and West Essex Integrated Care Board (HWE ICB) on the above-mentioned planning application.

The HWE ICB became a statutory body on 1 July 2022 and is the health commissioner responsible for delivering joined up health and social health care to a population of c1.8m. in Hertfordshire and west Essex.

The HWE ICB works in partnership with health providers, local authorities, and other organisations to:

- improve the general health and wellbeing of Hertfordshire and west Essex residents and improve health care services in the area.
- tackle the inequalities which affect people's physical and mental health, such as their ability to get the health services they need, and the quality of those services help tackle health and wider inequalities.
- get the most out of local health and care services and make sure that they are good value for money.
- help the NHS support social and economic development in Hertfordshire and west Essex.

Dr Jane Halpin, Chief Executive

Rt. Hon. Paul Burstow, Chair

Assessment of impact on existing Healthcare Provision

The HWE ICB has assessed the impact of the proposed development on existing primary health care provision in the vicinity of the development based on the information that this development will produce 10 dwellings creating circa **24 new patient registrations based on an average occupancy of 2.4 persons per unit.**

Within the HWE ICB there are 35 Primary Care Networks (PCNs) across the 14 localities; each covering a population of between circa 27,000 and 68,000 patients. These PCNs are expected to deliver services at scale for its registered population whilst working collaboratively with acute, community, voluntary and social care services in order to ensure an integrated approach to patient care. As such a doctors' general practitioners' surgery may include an ancillary pharmacy and ancillary facilities for treatments provided by general practitioners, nurses and other healthcare professionals. Broxbourne Alliance, under which this development directly falls, has a combined patient registration **list of 45,073** which is growing.

Patients are at liberty to choose which GP practice to register with providing they live within the practice boundary. However, the majority of patients choose to register with the surgery closest and/or most easily accessible to their home for the following reasons: it is the quickest journey, accessible by public transport or is in walking distance), parking provision, especially for families with young children and for older adults.

Despite premises constraints GP Practices are not allowed to close their lists to new registrations without consultation with, and permission from the HWE ICB. Even when surgeries are significantly constrained the NHS will seek to avoid a situation where a patient is denied access to their nearest GP surgery, with patient lists only closed in exceptional circumstances.

As a result of significant growth proposed in Local Plans, the HWE ICB expects applications to close lists to increase. It is therefore important that new developments make a financial contribution to mitigate any primary health care impacts the development will have.

Healthcare Needs Arising from the Proposed Development

This development will have an impact on primary health care provision in the Cuffley area and its implications, if unmitigated, would be unsustainable for the NHS.

The financial contribution for health infrastructure that the HWE ICB is seeking, to mitigate the primary health care impacts from this development, has been calculated using a formula based on the number of units proposed and does not take into account any existing deficiencies or shortfalls in the Cuffley area and its vicinity, or any other development proposals in the area.

Cost calculation of additional primary healthcare services arising from the development proposal

24 /2000 = 0.012 of a GP *GP based on ratio of 2,000 patients per 1 GP and 199m² as set out in the NHS England “Premises Principles of Best Practice Part 1 Procurement & Development”

0.012 x 199 m² = 2.388 m² of additional space required

2.388 m² x £7,000* per m² = £16,716 (*Build cost; includes fit out and fees)

£16,716 / 10 Dwellings = £1,671.60 per Dwelling (rounded up to £1,672 per Dwelling)

Total GMS monies requested: 10 Dwellings x £1,672 = £16,720.00

The HWE ICB therefore requests that this sum is secured through a planning obligation attached to any grant of planning permission, in the form of a Section 106 planning obligation. A trigger point of payment on occupancy of the 5th Dwelling is requested.

If planning permission is granted, the HWE ICB propose to focus Section 106 monies on Cuffley and Goffs Oak Medical Practice and/or Valley View Health Centre by way of expansion of the existing capacity. This may be in the form of internal reconfiguration at either site including repurposing space vacated by removal of the patients records to secure off site storage and/or digitisation of them. The cost of both the storage/digitisation and repurposing of the space would be a likely focus of the S106 spend. In addition, there is the possibility of taking on extra space at both sites, the availability of which is to be confirmed. All these options are being considered to enable increase of capacity and patient access to provide sufficient space to increase resources and clinical services and thus keep the patient lists open.

Please note, the developer contribution figures referred to in this response is a calculation only and that the final payment will be based on the actual dwelling unit mix and the inclusion of indexation.

In terms of identifying full projects at this stage please note:

- All projects are subject to Full Business Case approval by the HWE ICB and NHS England.
- Any commercial arrangement has to be agreed between the landowner, developer and end user based on a compliant design specification and which demonstrates value for money.
- All planning applications and responses are in the public domain; identifying a project before any design work starts and funding is discussed, agreed and secured may raise public

Dr Jane Halpin, Chief Executive

Rt. Hon. Paul Burstow, Chair

expectation and indicate a promise of improvements and increased capacity, which are subject to both the above points. Securing developers contributions to all aspects of healthcare is therefore vital.

- A project identified and costed in response to the planning application may not meet the objectives of current strategies or could have significantly increased in cost, especially if there has been any significant time lapse from the date of the response to the date of implementation of the planning consent.

In conclusion, in its capacity as the primary healthcare commissioner with full delegation from NHS England, the HWE ICB has identified a need for additional primary healthcare provision to mitigate the impacts arising from the proposed development. The cost calculation, set out above are those that the HWE ICB and NHS England deem appropriate having regard to the formulated needs arising from the development.

The HWE ICB is satisfied that the basis and value of the developer contribution sought is consistent with the policy and tests for imposing planning obligations, as set out in the NPPF. Further, NHS England and the HWE ICB reserve the right to apply for S106 money retrospectively and the right to amend and request that this be reflected in any S106 agreement.

Subject to certainty that developer contributions are secured, as set out above, the HWE ICB does not raise an objection to the proposed development.

The HWE ICB looks forward to working with the Council to satisfactorily address the issues raised in this consultation response and would appreciate acknowledgement of receipt of this letter.

Yours sincerely,

Sue Fogden MRICS LLB (Hons)
Director – Estates and Capital
NHS Hertfordshire & West Essex ICB
