# SMART EV CHARGING PLATFORM FOR CHARGE POINT OPERATORS & EV DRIVERS

Monta, the world-leading EV charging platform, provides businesses and EV drivers with complete control and management over their electric vehicle charging points.

From increasing accessibility to viewing real-time activity, Monta provides you with a modular, simple, and reliable charging management solution whilst eliminating admin work, thus saving time.

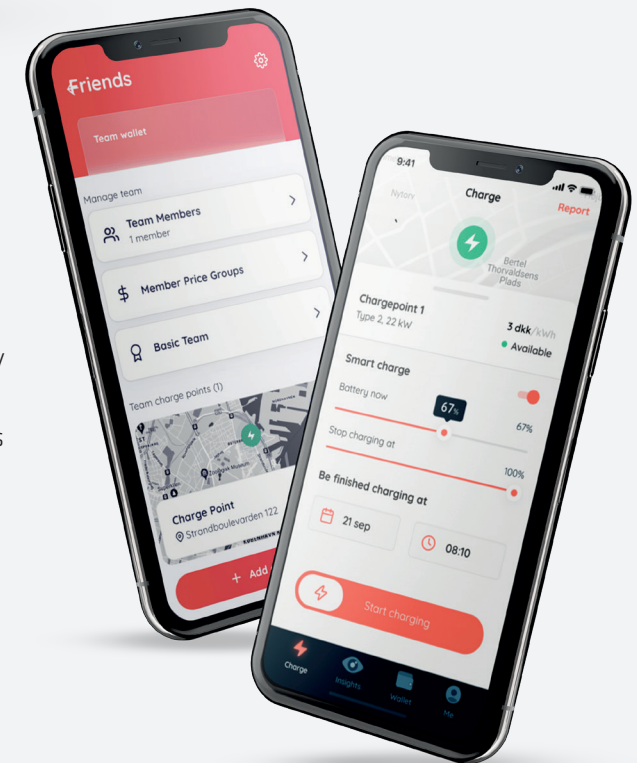

## App Overview

Available to download via Apple Store and Google Play, Monta's smartphone app allows EV drivers to charge and pay for their usage with the tap of a finger. The Monta app also provides drivers with insights into their charging behaviour, including cost and CO<sub>2</sub> savings.

## Portal Overview

With an easy-to-use interface, Monta's portal enables charge point operators to view charge point behaviour and activity. The portal provides an affordable EV charge point back-office management system without the outlay of developing your own back-office management system and associated applications.

### Full control of your charge points

- Schedule private, semi-public or public access to your charge points.
- Set custom pricing for employees, customers, guests, etc.
- Schedule price changes or opt for dynamic spot pricing for peace of mind.

### Earn money while promoting EV adoption

- Open up your charge points for public or semi-public access for additional income.
- Keep your existing customers satisfied while attracting new customers.
- All Monta users and our partners' users can now find your charge points.

### A superior charging experience for all EV drivers

- With the Monta map or QR codes, drivers get access to charging without having to download an app.
- Easy payment options via smartphone with Apple and Google Pay.
- 98% charging stability, compared to the industry average of 85%.

# PRICING

By integrating Sevadis' EV charge point range with Monta, businesses and organisations can benefit from smart features at an affordable monthly cost.

1. Only for admin / owners of teams / operators
2. This Smart queue feature enables EV drivers to join the virtual queue at one of multiple charging sites and allows drivers to get notified when the chargepoint becomes available for them
3. Load balancing is the distribution of power between the different points of consumption. In other words, Monta automatically divides the available power over the vehicles that are charging
4. Member fees, select chargepoints access
5. In your team's wallet, you can see the transactions from and to the wallet and export the list of all the transactions
6. Relevant for companies reimbursing their employees for charging at home
7. Share your chargepoints on the world's largest roaming platform Hubject – 8% transaction fee
8. Enterprise security features: audit log, ip whitelist, 2factor / saml

## Pricing Structures Per Month:

Non 4G Units	£5.50 per socket
4G Units	£10.50 per socket
