Comments	<p>I object to the discharge of the LEMP in this case as the proposed bird boxes are wholly inadequate, both in terms of the model and location As was made clear in a previous comment, Sparrow boxes are a poor design and are unlikely to be used. Swift bricks should be specified instead as they conform to BS42021, making them universal nest bricks, providing nest cavities for a variety of small birds. House Sparrows readily use Swift bricks but the reverse does not apply - see here for further details: https://cieem.net/swift-bricks-the-universal-nest-brick-by-dick-newell/ In addition, any bird boxes located on garages are prone to being removed or blocked as they will be easy to reach by householders. They should be moved to high up on gable ends of the houses instead. Further details on the best locations for integrated bird boxes is attached separately Please require amended plans to show the model and location of at least 10 integrated Swift brick</p>
